The 4-step learning to write system

The 4 for learning to write - Back in 2008, Pelikan once again made history with its four-level approach to teaching kids how to write. **The world's first comprehensive learn-to-write system** remains a success to this day and has inspired many imitators.

What makes the griffix writing instruments so unique is their **innovative, child-friendly grip**, which was developed in line with the latest findings in graphomotor skills in cooperation with education experts and the Fraunhofer Institute for Industrial Engineering.

The **perfect tripod grasp**: The **ergonomic grip zone** – which provides support for the thumb, index finger and middle finger – is based on the best way to hold a pen or pencil, the tripod grasp. The grasp offers children an ideal range of motion and allows both right- and left-handed learners to write without fatigue or hand cramps.

The **four-level griffix learn-to-write system** is the first **integrated concept** that supports the process of learning to write from the very start. What makes it so special is that the grip remains the same as the writing instruments grow more sophisticated. That way, children don't need to start from scratch as they grow and learn.

The mission:
the perfect
tripod grasp

From drawing to writing:

Get ready for school with the right grip and the right grasp.

4 Fountain pen

Welcome to the big leagues:

The image shows two pencils, one red and one blue, in their original packaging. The packaging is a blue card with a white border. At the top, the 'Pelikan' logo is visible. Below it, the text 'Silberrainbow Bicolor Pencil' is printed. The pencils are shown in a way that highlights their dual-colored barrels. The background of the card features a sketch of a landscape with a rainbow and some handwritten text.
